PROFESSIONAL SUMMARY

Aspiring Data Analyst with two years of professional experience in a regulated hospital-pharmacy environment and hands-on expertise in SQL, Python, Power BI, DAX and Advanced Excel. Builds end-to-end analytics solutions—from data cleaning and relational modelling to SQL analysis, KPI development and interactive reporting. Combines practical healthcare and pharmaceutical operations knowledge with a strong interest in business intelligence. Currently pursuing an MBA in Operations Management.

TECHNICAL SKILLS

SQL & Databases	MySQL; joins, aggregations, subqueries, CTEs, window functions, query optimisation
Python	Pandas, NumPy, data cleaning, transformation, groupby/aggregation, Jupyter Notebook
Power BI	Data modelling, DAX measures, CALCULATE context, time intelligence, interactive dashboards
Excel & Visualisation	Pivot Tables, XLOOKUP, SUMIFS, FILTER, UNIQUE, Power Query; Matplotlib, Seaborn, Plotly
Analytics	EDA, KPI definition, data quality assessment, statistical analysis, business reporting and storytelling

PROFESSIONAL EXPERIENCE

Registered Pharmacist | Feb 2024 - Feb 2026

Max Healthcare (Max Hospital), Gurugram, Haryana

Maintained daily emergency-medicine consumption, closing-stock and reorder-level records in a regulated, audit-driven hospital environment.

Raised manager-approved indent orders and maintained signed documentation for stock-replenishment transactions.

Reconciled ward and floor stock returns against system entries and physical inventory, documenting quantity differences accurately.

Dispensed medicines against prescriptions and supported narcotics and IV-stock audits by verifying records against statutory registers.

SELECTED ANALYTICS PROJECTS

Supply Chain & Logistics Delivery Performance Dashboard

Python • Power BI • DAX • Data Modelling

Analysed 200,000 order shipments across customer, product, warehouse and carrier data to evaluate fulfilment efficiency, delivery SLAs, shipping costs and profitability.

Built Power BI KPI measures for ₹3.95Bn revenue, ₹518.09M net profit, 13.13% net margin, 86.19% on-time delivery and a four-day average delivery cycle.

Identified Air Freight as the costliest mode at ₹266.99 average cost/order, nearly 80% above Road Freight; highlighted warehouse return-rate and late-order patterns.

Indian Financial Fraud Analytics Dashboard

Python • SQL / MySQL • Power BI • DAX

Analysed a 250,000-row synthetic financial-transactions dataset linked with customer, card and merchant data to investigate payment, card, location and merchant-risk patterns.

Created fraud-monitoring KPIs including 5.4% fraud rate and 91% transaction success rate; segmented exposure by state, payment channel, card status and merchant category.

Highlighted expired-card transactions, late-night activity and high-exposure states/merchant categories to support focused risk investigation.

SELECTED ANALYTICS PROJECTS & EDUCATION

SELECTED ANALYTICS PROJECTS — CONTINUED

E-Commerce Sales Analysis Dashboard

MySQL • Power BI • DAX • Advanced Excel

Built an end-to-end sales analytics solution using MySQL for data preparation and analysis, with Power BI and DAX for interactive reporting.

Defined Total Sales, Total Profit, Total Orders, Profit Margin and Average Order Value KPIs; used SQL window functions for category and regional ranking.

Delivered views for monthly sales trends, category and regional performance, payment-mode mix and top-selling products; found Home Decor led sales/profit while the South region recorded the lowest sales.

HR Analytics Dashboard

Python / Pandas • MySQL • Power BI

Cleaned and transformed employee data using Pandas, performed SQL analysis and developed an interactive Power BI dashboard for workforce reporting.

Tracked 4,410 employees, including 3,699 active employees, and quantified overall attrition at 16.12% through department, age, performance and job-satisfaction analysis.

Reported that R&D had the largest workforce and highest average salary, while employees aged 26-35 formed the largest workforce segment.

Smoking Health Risk Analytics Dashboard

Python • Pandas • Power BI • DAX • Data Modelling

Designed an educational Power BI dashboard around a 30,000-row synthetic, risk-enriched cohort to analyse smoking-status, lifestyle, blood-pressure, cholesterol and organ-wise risk indicators.

Created controlled Never, Current and Former smoker distributions across Human Body, Heart, Lungs, Liver and Kidney analysis views; all labels and scores are illustrative and non-clinical.

ADDITIONAL PROJECTS & PORTFOLIO

Additional work: Bank Analytics and Zomato Analytics dashboards. View live dashboards, screenshots, project files and published Kaggle datasets at jatinanalytics.co.in.

EDUCATION

MBA in Operations Management	Jan 2026 – Present
Vivekananda Global University	
Bachelor of Computer Applications (BCA)	2022 – 2025
Sikkim Alpine University	
Diploma in Pharmacy (D.Pharm)	2020 – 2022
Apeejay Styra University	

CERTIFICATION

Complete Data Analyst Bootcamp – From Basics To Advanced | Completed Jul 2026

KRISHAI Technologies (Krish Naik, Jayant Topnani) via Udemy | 89 hours | Credential ID: UC-0424329d

Verification: ude.my/UC-0424329d-4d67-4fb8-b596-33cc47844312

ADDITIONAL INFORMATION

Domain strength: Healthcare and pharmaceutical operations, dispensing records, statutory registers, ROL-based replenishment and audit documentation.

Registration: Registered Pharmacist — Pharmacy Council registration.

Languages: English, Hindi. Availability: Open to relocation across Delhi NCR and remote roles.
